The only certified whole-house Arsenic Reduction Filter on the market.

Arsenic is a semi-metallic element that occurs naturally in the Earth's crust. In water it is odorless, colorless, and tasteless. Arsenic can also be the byproduct of manufacturing and agricultural activities. It can enter water through the ground or as runoff into surface water sources. The only reliable way to remove arsenic from your water for the entire home is with an Arsenic specific filter media.

If you have arsenic in your water or concerned it could be present your local Culligan dealer can analyze your water to identify this contaminant* and recommend a household treatment solution. If you need to reduce arsenic in your water, the Culligan Aquasential Arsenic Reduction Filter with Cull-AsX53 media can do just that.

* Contaminants may not be in your water.

Product Specifications

Patented Smart Technology

- Exclusive Culligan Soft-Minder® meter monitors daily water use, media life and provides advanced system diagnostics.
- The easy-to-read back-lit display lets you know your filter is working and alerts you of system malfunctions and when the Cull-AsX53 media needs replacement.
- Culligan's Connect App provides peace of mind with 24/7 monitoring and control of your Culligan equipment.
- Optional Leak Sensor provides peace of mind if there is a water or moisture issue.

Exclusive Reliable Design

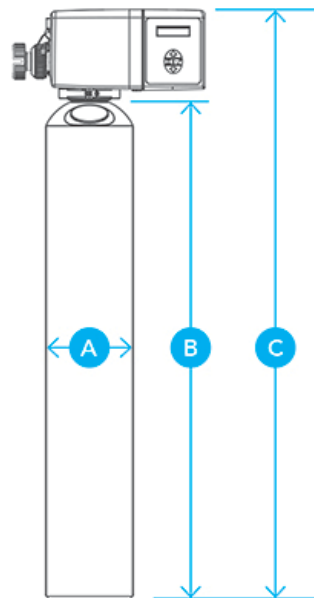

- Mechanical improvements including design updates and indicator lights to make sure your system is always in peak condition
- Exclusive, non-corrosive valve using motorized pistons that provide more reliability than rotary valve systems.
- High-impact Quadra-Hull® Tank uses a four-layer design that resists UV rays, corrosion and provides a sweat jacket to reduce condensation. Limited lifetime warranty.
- Efficient 1" control valve, lets you bypass the system without losing pressure for times when filtered water is not needed (for watering the lawn, etc.).
- No hassles of regeneration chemicals, salts or additives.
- Culligan Aquasential Smart HE Series Arsenic Reduction filters are available as indoor and outdoor models.

Cull-AsX53 Arsenic Reduction Media

- High adsorption Cull-AsX53 media provides maximum arsenic reduction capacity and assures stability and long life. The high grade quartz underbedding evenly distributes water to maximize flow rates.
- The Smart HE controller continually monitors arsenic media life and alerts you when the Cull-AsX53 media needs replacement.
- Cull-AsX53 media has the ability to remove Type III and Type V Arsenic up to a challenge level of 100 parts per billion.*

System Size	Media Volume	Rated Capacity*	A	B	C
12"	2.0 cu.ft.	125,000 gallons	12"	52"	60"
14"	3.0 cu.ft.	180,000 gallons	14"	65"	73"
16"	4.0 cu.ft.	250,000 gallons	16"	65"	73"

* Capacities are based on certification testing results by IAPMO R&T at pH levels of 6.5 and 8.5 for 100 parts per billion (ppb) total of Type III and Type V arsenic challenge level. Proper pre-treatment is required and treated water capacity can vary based on overall water characteristics.
